

**GLOBALNEST SAP UPGRADE:**

SAP is constantly improving, enhancing and adapting its products to reflect changing business and technical environments. As SAP releases its newer offerings, current SAP customers face challenges with support, maintenance costs, and functionality of their existing implementations. These challenges hinder new business initiatives and increase Total Cost of Ownership (TCO). As time goes by, SAP recommends clients to upgrade the systems version. We at Globalnest will work with you and ensure a fast, smooth process that maximizes business benefits and helps you achieve your goals. Our track record covers upgrades of all SAP releases from R/3 through ECC 6.0.

**Upgrade Assessment:**

- Upgrade project plan
- Resource plan
- Budgetary estimate
- Risk analysis
- Hardware/software architecture roadmap
- Additional deliverables for the core plus assessment
- Functionality roadmap
